

Please don't let the Low Power FM stations take priority over the current FM translator service. My son and I listen to AIR 1, which uses the current FM translator service. We listen to this station every day. It is the one station we can both listen to because we like the type of music it plays. AIR 1 offers hope to our local community. Sometimes when you need that little bit of hope, AIR 1 is there. The service provided by AIR 1 is in the public's best interest because it provides an alternative to listeners. It plays music that deals with real life issues and ministers to people. Please AIR 1 on the air!
